GOLDBLOCKDESIGN.COM

ABOUT US

Established in 1980, Goldblock Design specialises in providing the print finishing services to the printing trade, including hot foiling printing, embossing and die-cutting. Many a project has been enhanced with the unique finishing touches our processes provide. With industry and machinery experience of almost 40 years we can confidently provide a unique service; combining authentic craftsmanship practices, with present prestige finishing requirements.

The care and precision with which we add these printing techniques is what has given Goldblock Design its reputation. While technologies have advanced, our individual care for each project remains.

OUR SERVICES

HOT FOIL PRINTING

Add a reflective element, and touch of luxury to your designs with traditional hot-foil print. From the very beginnings of Goldblock Design, hot foil printing has been our passion - nothing adds class to a design like a hint of metallic foil.

EMBOSSING

Embossing stationary or print gives it a tactile quality that demands attention. Bring a design into relief, and give it a depth and quality to touch. We especially love projects that combine hot foiling and embossing to create something which stands out and is spectacular.

DIE CUTTING

Bring another dimension to packaging or stationary with intricate die cut designs. These look great as packaging peep-throughs, showing off contents, or with a contrasting colour backing for eye-catching stationary.

CONTRACT FOIL PRINTING

With the variety of foiling machines we operate at Goldblock Design we are able to take on contract printing for manufacturers and suppliers of products including those made from both flexible and ridged polypropylene, laminated card or display board - Tags, Backing Cards, Book Covers etc.

We at Goldblock Design have gained a reputation for our persistent and innovative 'can do' approach to achieve high quality results on challenging items whether it be an odd shaped floppy tag or heavily grained padded cover-

We look forward to the next challenge!!

LUXURY STATIONARY

We've been commissioned many times by printers, to create a luxury or 'prestigious' impression on certificates, invites or high-class stationary.

Hot foil print, embossing, debossing, spot gloss effects or even precise die-cutting... Goldblock are experts in all of the traditional techniques!

The pictured certificate creates an authentic and sought-after look, with an embossed crest and 'seal', printed on a thick, luxury paper stock.

Other frequent projects that require the Goldblock touch, include Wedding invitations, company event announcements, or greeting cards.

CORPORATE & CLASSY IMPRESSIONS

We all know how important first impressions are in the business world. Much of Goldblock's work for printers centres around creating 'the perfect finish' for business cards, brochures or branded literature.

Especially relevant if your customers are out to make a statement, or you want to give them more ways to show off their brand style to the world!

Business event invitations, Christmas cards from

the team, and portfolios for presenting literature - we've had a wide spectrum of corporate printing projects through the doors of Goldblock!

The pictured project uses a subtle deboss and spot gloss with a black-on-black logo. As business cards, this design really goes the extra mile in impressing... Truly a card to keep hold of!

If you're looking to up your stationary game and enhance your options, Goldblock is the place to come for luxury printing finishes!

EVENT PUBLICITY

How would you feel to receive an embossed, gold-foil invite to a film premiere, as pictured?

We get lots of event invitations put our way from printers, to add the finishing luxury touches.

It goes without saying it adds a whole new realm of anticipation to the event, and is much more likely to draw in the crowds than that of plain text, or an email invite!

Whether as part of a high-end mailout, hand-out literature or even part of an awards ceremony... Whatever your customers dream up, offer them the option of the luxurious feel of Hot-foil printing and embossing to enhance their project.

The sense of distinctive prestige created by these outstanding items of print more than justify their place on the events budget.
